# The steward of the Open Source Definition

The foundation for the entire Open  
Source software ecosystem.

# We define Open Source

Simplifying software development and procurement

## Our programs

### License and Legal

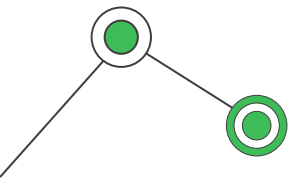

An anchor for open community consensus on what constitutes Open Source. We protect the Open Source principles, enforcing the marks “Certified Open Source” and “Open Source Approved License”.

### Policy & Standards

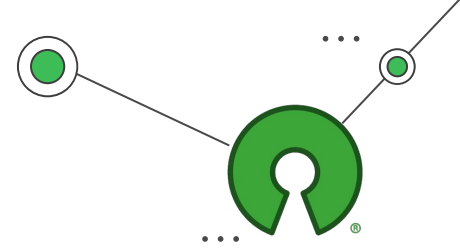

Monitoring policy and standards setting organizations. Supporting legislators and policy makers educating them about the Open Source ecosystem, its role in innovation and its value for an open future.

### Advocacy & Outreach

Leading global conversations with non-profits, developers and lawyers to improve the understanding of Open Source principles and practice. OSI investigates the impacts of ongoing debates around Open Source, from artificial intelligence to security.

Approved License®

# ClearlyDefined

We aim to crowdsource a global database of licensing metadata for every software component ever published for the benefit of all.

**Bringing clarity to  
Open Source Software  
licenses.**

Use the Data

Curate Data

Contribute Data

Contribute Code

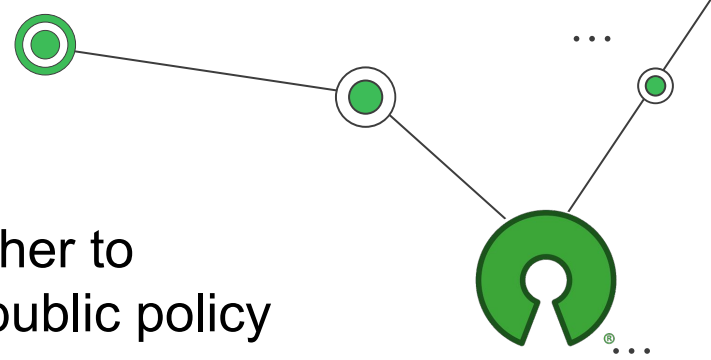

Add a Harvest

Adopt Practices

# Open Policy Alliance

We bring non-profit organizations together to participate in educating and informing public policy decisions related to Open Source software, content, research, and education.

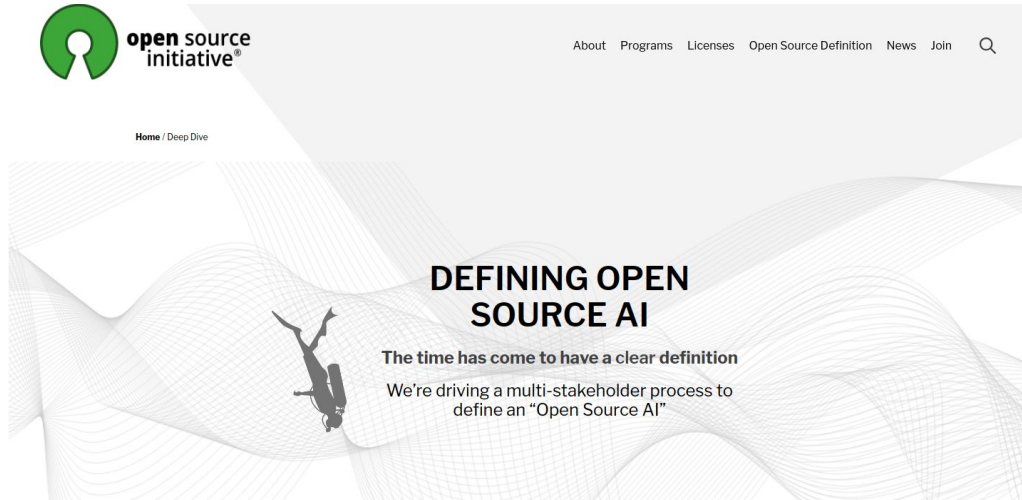

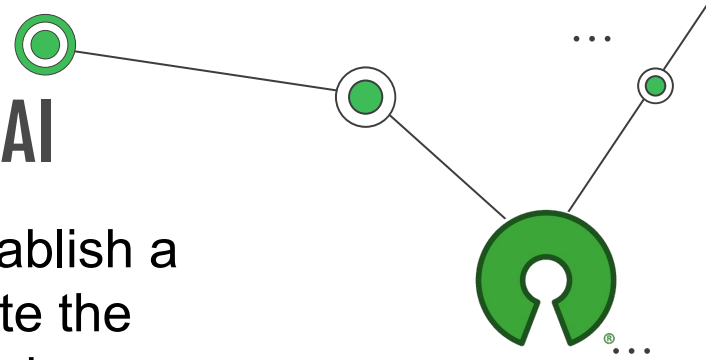

**Global collaboration**  
**Local education**

Bringing non-profit organizations together

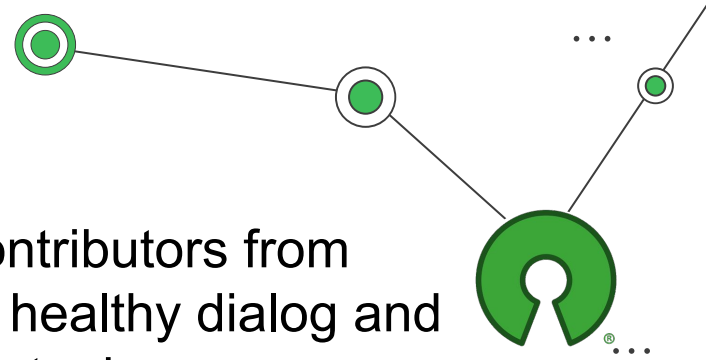

# Deep Dive: Defining Open Source AI

We bring together global experts to establish a shared set of principles that can recreate the permissionless, pragmatic and simplified collaboration for AI practitioners.

# OpenSource.net

We gave a new home to the community of contributors from opensource.com. The new platform supports healthy dialog and informed education on Open Source software topics.

# Our impact 2023

# Licenses and legal

## Enriched license pages

Added relevant metadata to each license

## Assured completeness

Reviewed archival materials to assure the list of licenses is complete

## New review process

Simplified and clarified the workflow for new and legacy licenses

## Started thorough review

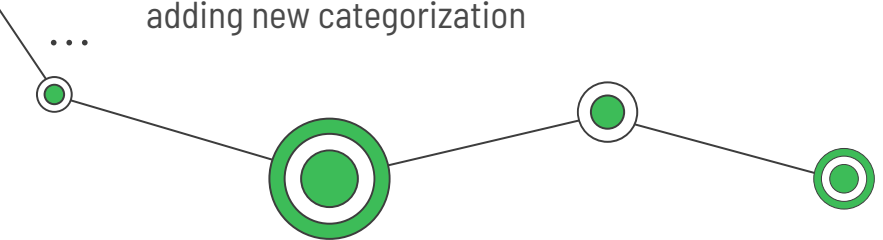

Analyzing licenses for incoherent approvals adding new categorization

## Approved new licenses

Three new licenses have been added and one superseded

## DC License Clinic

Delivered workshop tailored for US federal employees

# Policy and standards

## Joined Unicef's Digital Public Goods Alliance (DPGA)

To accelerate the attainment of UN's sustainable development goals

## Launched Open Policy Alliance

20 initial members, including Apache Software Foundation, Eclipse Foundation, Python Software Foundation

## Cyber Resilience Act in Europe

Educating regulators in Brussels, partnering with OFE, FSFE and others

## Securing Open Source Software Act in US

Educating regulators in DC, hosted workshop with federal agencies

# Defining Open Source AI

## *Leading a global conversation*

### 4 drafts

Running towards a shared definition

### 6 workshops

Met Open Source experts, developers, lawyers, policy makers

### 4 continents

Presented in North America, Europe, LATAM, Africa, Asia

### 75 drafting members

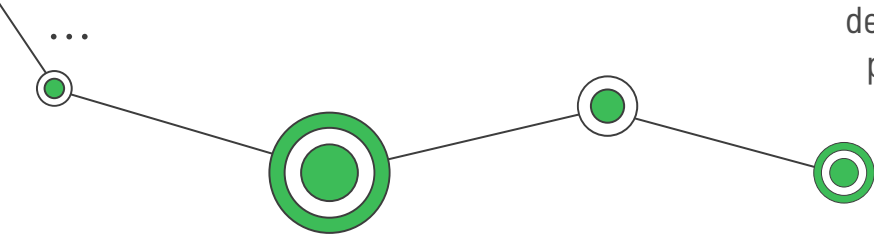

A closed group of advisors reviewing drafts before public release

### 18 webinars

Presented by international experts of AI ethics, development, deployment and procurement

### 15 blog posts

Opinions, technical and legal explainers, advocacy and outreach pieces

# We contributed to 30+ events in 2023

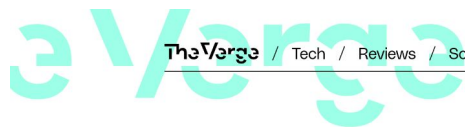

30+ events across the world  
125K+ attendees overall

# Educating and countering misinformation 85 times in 2023

Plus numerous audio/video interviews

### COMPUTING

### The future of open source is still very much in flux

Free and open software have transformed the tech industry. But we still have a lot to work out to make them healthy, equitable enterprises.
